Read the text below and then, answer the questions.

Passage 1

It was a winter morning and the students were listening happily to their lovely teacher at an elementary school in Shaft when suddenly the heater of the class caught fire. The fire was everywhere very quickly and the dedicated teacher, who had felt the danger, tried to rescue each child by holding them one by one in his arms and taking them out. But a severe wind shut the door of the class, and the flames of the fire raged so high that he couldn't get out of it.

Finally, although he could save his students' lives, unfortunately, he was so badly injured during the fire that physicians couldn't help him. Hassan Omidzadeh, the distinguished teacher, died in a hospital in Fooman, in 2012, at age 58 (15 years after the fire) as a result of the burns and injuries that he received from the fire.

This event was the hot news for many years. People were talking about Hassan's brave act everywhere. Hassan died because of his love for his students. Instinct of survival makes every human being prefer to survive and escape the danger, but Hassan Omidzadeh did what not many people could ever think of at the moment of danger.

His name along with other heroes of our homeland like Muhammad Hussein Fahmideh and Riz Ali Khajavi is listed in school textbooks.

A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word "dictionary" comes from the Latin "dicto"('saying').

There are several types of dictionaries. Dictionaries which explain words and how they are used; this type is simply called monolingual dictionary, dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explains the meanings of technical words.

Dictionaries which explain what words mean give a clear "definition" of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced.

There are also dictionaries which translate words into other languages. We call them bilingual dictionaries. Very often one volume translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English.

When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning.
