Nasireddin Toosi was one of the most famous Iranian scientists and thinkers. He was born in Mashhad, February 18, 1201. He grew up there. His father was his first teacher. He taught him the Holy Quran and his uncle taught him physics. His father died when he was a child. He got very sad, but he did not lose his hope. He decided to learn more and become a person like his father. He started learning more sciences from other scientist like Imam Fakhr-e- Razi.

He started the first observatory in Maragheh in 1259 to study about the stars and planets. Nasireddin worked for twelve years in this observatory. He also built a large library there. There were more than four hundred thousand books in it. It was very difficult to build such places at that time, but he tried hard and succeeded.

Nasireddin was very hard working. He wrote about 150 books. Also, he translated some books into Arabic. Finally, he passed away in 1274.
