We can see Uranus and Neptune d) body against microbes 5. People need more places living e) only with powerful telescope 6. The heart pumps blood around body f) sixty moons</p>	1.5												
11	<p>Read the passage carefully and answer the questions.</p> <p>Wonders about planets will not finish and everybody is really interested to know more about them. For example, our Earth goes around the Sun in one year, while Jupiter goes around it in twelve years because it is farther than the Earth, or something special about Mars is its red color. There are also some red places on Jupiter. In Mercury at night the weather is so cold and on the day the weather is really hot. Mercury is the only planet with this difference in its weather at night or during the day. Neptune is the farthest planet but Mercury is the nearest. What about our planet? Its water and oxygen that protect our lives are special things about our Earth.</p> <p>1. We can see red color on Jupiter and Mars. True / False</p> <p>Answer the following questions:</p> <p>2. Why does it take twelve years or Jupiter to orbit the Sun?</p> <p>3. Which planet is the closest of all?</p> <p>4. What are special things about our planet?</p> <p style="text-align: right;">Good Luck</p>	3.5
