Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease. There are so many different types of microbes. We still don't really know how many there are, but we know that they do lots of different things. Bacteria and viruses are two important types of microbes.

Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria! Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they can not live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses- they usually attack your body and make you sick!

Shams ol-Emareh is one of the tallest buildings of old Tehran. This palace is located in the eastern part of Golestan Palace and belongs to Qajar times. Nasser al-Din Shah became interested in tall buildings when he was visiting abroad, so he asked Nazem al-Dowleh to choose a site and build a palace for his family and office work. He finished the building two years later in 1867. This building is made of brick and has three floors and two towers on the top with a small clock tower in the middle. You can find some of the most beautiful paintings of Kamal ol-Molk there. If you visit Tehran, don't miss this part of old Tehran.

50)Why did the king ask Nazem ol-Dowleh to build the palace?
