| 4 | <p>IV. Reading</p> <p>Read the following passage carefully to answer the questions.</p> <p>There's a big difference between the amount of sleep you can get by on and the amount you need to function optimally. According to the National Institutes of Health, the average adult sleeps less than seven hours per night. In today's fast-based society, six or seven hours of sleep may sound pretty good. In reality, though, if you sleep that long, you are most probably not getting the sleep you need. Just because you're able to operate on six or seven hours of sleep doesn't mean you wouldn't feel a lot better and get more done if you spent an extra hour or two in bed.</p> <p>While sleep requirements vary slightly from person to person, most healthy adults need between 7 to 9 hours sleep per night to function at their best. Children and teenagers need even more. And despite the notion that our sleep needs decrease with age, most older people still need at least 7 hours of sleep. Since older adults often have trouble sleeping this long at night, daytime naps can help fill in the gap.</p> <p>36. What is the main idea of the passage?</p> <p>a. Differences in sleep patterns</p> <p>b. Ways to improve our sleeping habits</p> <p>c. The amount of sleep humans need</p> <p>d. Reasons why we do not sleep enough</p> <p>37. According to the passage, the appropriate number of hours of sleep for people</p> <p>a. is on the rise in today's fast- based society</p> <p>b. is something between 6 to 7 hours per day</p> <p>c. depends on their daily function</p> <p>d. is not exactly the same</p> | 12 |
