**9. Read the passages and answer the questions.( 7 )**

A) What is the commonest disease in the world? It is probably the common cold. It makes people miss work and school more than any other diseases. It is still one of the most difficult illness to cure and treat. You will be lucky if it lasts less than one week. This unwelcome disease can make you feel very bad and tired and also it makes your muscles very weak.

Most doctor believe that taking different medicines can help you to cure this disease but the best way is to drink lots of water and wait. Wait until its period pass.

- 1. How long does common cold last?**  
**2. What is the best way to cure common cold?**  
**3. There are a few medicines for common cold.**  
**4. It is still difficult to cure common cold.**

True ( ) False ( )  
True ( ) False ( )

B) Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease. There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes. Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria! Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses – they usually attack your body and make you sick!

**A. True or False**

1. Microbe is an important type of bacteria. a. True b. False  
2. Bacteria do not need to be inside a living cell to live. a. True b. False

**B. Answer the following questions.**

1. Where can we find bacteria?  
2. How are bacteria different from viruses?

**C. Complete the sentences based on the text.**

1. Viruses.....our body and cause different diseases.  
2. There are so many.....of microbes.
