You can visit a34.....wildlife museum or park. These places give good35..... about how to protect animals and their36..... . You can do voluntary work to37.....animals and their babies.

C) Reading Comprehension: Read the text.

Heart is a strong pump that sends blood around your body. It works all the time even when you are sleeping. It pumps blood that is full of oxygen and food to every part of your body.

4 You have blood everywhere inside your body. A blood sample is usually 45% blood cells and 55% plasma. The blood cells move in a yellow liquid. The liquid is called Plasma. It carries blood cells. Types of blood cells are red blood cells and white blood cells. Red blood cells give the blood its red color. There are 5 millions of them in a drop of blood. Red blood cells are so small that you can't see them with your eyes. You can see them with a microscope. The red blood cells carry oxygen to every part of your body. White blood cells are larger than red blood cells, but there are less of them. There are 8000 in one drop of blood. They defend your body against microbes.

38. . According to the passage ,it is not true that

- a) plasma carries white and red blood cells
- b) The number of blood cells is less than plasma
- c) red blood cells are not smaller than white blood cells
- d) your blood has less white blood cells than red blood cells

39. Which one is not in your blood?

- a) red blood cells
- b) plasma
- c) heart
- d) white blood cells

40. You can see red blood cells without a microscope a) True b) False

41. The blood is red because of red blood cells. a) True b) False

42. What carries oxygen around the body?

43. How many white blood cells are there in a drop of blood?
