16 . 1. lakes 2. plains 3. places 4. seas
17. 1. increase 2. die out 3. live 4. describe

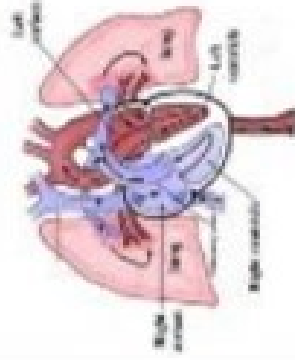

Reading

Your heart is really a muscle. It's a little to the left side of your chest, and it's about the size of your hand. There are lots of muscles all over your body -- in your arms, in your legs, in your back, even in your behind. Muscle helps body to move.

But the heart muscle is important because of what it does. The heart sends blood around your body. The **blood** gives the oxygen and food to your body. It also carries away waste.

The heart has four different parts, and each of these parts is called a chamber. There are two chambers on top and two chambers down. The chamber on top is called the atrium. There are left atrium and right atrium. The two chambers on down are called the ventricles. The heart has a left ventricle and a right ventricle. (look at the picture)

Your heart is a type of pump, or two pumps in one. The right side of your heart receives blood from the body and pumps it to the lungs. The left side of the heart does the opposite: it receives blood from the lungs and pumps it out to the body. Blood from body comes first to right atrium, then it goes down to right ventricle. Right ventricle pumps blood to lungs. Blood in the lungs gets oxygen and gives carbon dioxide and goes back to left atrium. From left atrium it moves to left ventricle. Finally left ventricle pumps blood strongly to all parts of body.

18-The text talks about how works.

- | | | | |
|-----------|-----------|----------|--------------|
| 1. muscle | 2. atrium | 3. heart | 4. ventricle |
|-----------|-----------|----------|--------------|

19.How many chambers does heart have?

- | | | | |
|-------|------|------|------|
| 1 - 4 | 2, 3 | 3, 6 | 4, 2 |
|-------|------|------|------|

20. Which chamber pumps blood to the lungs?

- | | | | |
|-----------------|----------------|--------------------|---------------------|
| 1. Right atrium | 2. left atrium | 3. left ventricles | 4. right ventricles |
|-----------------|----------------|--------------------|---------------------|

21 Which chamber pumps blood to all parts of body?

- | | | | |
|----------------|--------------------|-----------------|---------------------|
| 1. left atrium | 2. left ventricles | 3. Right atrium | 4. right ventricles |
|----------------|--------------------|-----------------|---------------------|

22.Blood from lungs comes back to

- | | | | |
|-----------------|---------------------|----------------|--------------------|
| 1. right atrium | 2. right ventricles | 3. left atrium | 4. left ventricles |
|-----------------|---------------------|----------------|--------------------|

23. Blood goes to left ventricles before it goes to right atrium.

- | | |
|---------|----------|
| 1- true | 2- false |
|---------|----------|

24. Blood in the lungs gives oxygen and gets carbon dioxide.

- | | |
|---------|----------|
| 1- true | 2- false |
|---------|----------|
