متن زیر را بخوانید و به سوالات آن پاسخ دهید.

Today, there are some endangered animals on Earth. It means that we can find only a few of them around us. Some examples are whales, pandas, tigers and Asian elephants. Humans destroy the natural homes of the animals in the forests, lakes, and plains. When the number of people on Earth increases, they need more places for living. They cut trees and destroy lakes. They make homes and roads instead. Then the animals won't have a place to live. They will die out. The Iranian cheetah is among these animals. This wild animal lives only in the plains of Iran. Now there are only a few Iranian cheetahs alive. If people take care of them, there is hope for this beautiful animal to live. Recently, families are paying more attention to nature, students learn about saving wildlife, and some hunters don't go hunting anymore. Hopefully, the number of cheetahs is going to increase in the future.

**A. Choose the best answer.**

۲۹. Which of them is not an endangered animal?

- a) wolf      b) cheetah      c) horse

۳۰. Where is the natural home of the Iranian cheetah?

- a) forest      b) plain      c) mountain

**B. True/False**

۳۱. In the past, many hunters paid attention to wildlife.      True       False

۳۲. Students are interested in protecting nature.      True       False
