	26- Which is the more dangerous animal in the world?							
	A B C D							

K: Read the passage and answer the questions. The solar system is the sun and the objects that travel around it. The sun is a star like the other stars in the sky but it is much closer to the Earth. The sun is a big ball of gases made mostly up of hydrogen and helium. There are seven other planets that travel around the sun, too. These planets, in order, are Mercury, Venus, Mars, Jupiter, Saturn, Uranus and Neptune. Earth is between Venus and Mars. 27- The sun and the objects that travel around it is called	2	Reading					
The solar system is the sun and the objects that travel around it. The sun is a star like the other stars in the sky but it is much closer to the Earth.
