43. Their work helped scientist learn more about the moon					
44. The Apollo mission landed 12 humans on the moon between 1967 and 1972					

C: Reading Comprehension:

Read the following texts carefully, then answer the questions by choosing the best choice.

Passage one: (3 points)

Although I have a car, I prefer to travel by train, especially if it is a long trip. As the train travels at speed through the countryside, I can drink coffee, read a book, or just look out of the window. Sometimes the movement of the train makes me fall asleep, something you couldn't do while driving a car. The trouble is that I hate waiting on cold stations, and I get angry when I have to spend a long time looking for a taxi or a bus at the beginning or at the end of the trip.

- 45. The writer prefers to travel by train because
 - a. it makes him feel moving
- b. it is more comfortable
- c. he dislikes looking for a taxi
- d. travelling is not usually long
- 46. One good thing about travelling by train is that you
 - a. cannot move or sleep
- b. get angry easily

c. get tired and thirsty

- d. can read, watch and sleep
- 47. Travelling by train is more enjoyable than driving one's own car, although it might not ...
 - a. start or end very happily
- b. put you to a nice sleep
- c. give you a view of countryside
- d. help you get into trouble

Passage two: (4 points)

The basic idea of a computer is that we can make the machine do what we want by giving it the necessary information which it processes. For this reason , computers can be described as devices which accept information in the form of instructions called programs , perform mathematical operations on the information, and then present the result of these operations. The program which tells the computer what to do and the information needed to solve the problems are kept in the memory of the computer.

- 48. From the passage, we understand that computers won't work unless we
 - a. process their data

- b. produce the memory
- c. give them necessary instructions
- d. perform mathematical operations

- 49. According to the passage, a computer program is the
 - a. stored information needed for the memory
- b. information given in the form of instructions
- c. processed information given to the computer
- d. result of mathematical operations
- 50. A computer is a programmable machine.
- a. True

b. False

- 51. The memory of a computer can store information.
- a. True

b. False

Passage three: (7 points)

Read the following passage and fill in the table that follows.

There were three famous sisters named Bronte. Their names were Charlotte, Emily, and Anne, and they were all writers. They were daughters of a clergyman, and had two older sisters and a brother. They went to a very strict school when they were girls, and later they became teachers and governesses. Charlotte's most famous novel was *Jane Eyre*, a story of some of her experiences in school and as a governess. Emily wrote *Wuthering Heights*, a tragic love story that describes the countryside in which the girls were brought up. Anne wrote two good novels, *Agnes Grey* and *The Tenant of Wildfell Hall*, but neither was as great as her sisters'. All the sisters wrote under "pen-names," calling themselves Currer, Ellis and Acton Bell, and for a long time not even their publishers knew who they really were. Charlotte, Emily and Anne all died of tuberculosis at an early age.

Charlotte Bronte was born in 1816 and died in 1855. She was the only sister who married and she lived longest, though she was only 39 when she died. Emily, born in 1818, died in 1848, when she was barely 30, and Anne, born in 1820, died in 1849, aged 29. Their brother Branwell Bronte, whom they loved and admired very much, was born in 1817 and died in 1848.

Writer	Most famous novel(s)	Date of birth	Age when she died
Charlotte	(52)	(56)	(59)
Emily	(53)	(57)	(60)
Anne	(54)		(61)

Now write short answers to the following questions.

- 62. How many brothers did the Bronte sisters have?
- 63. What was their father's job?....
