| 5 | B: Read the passage and answer the questions: <br> The sun, at the center of solar system, and the planets around it are among the wonders of creation. Venus is the second planet from the sun which is sometimes called Earth's twin. This is because their sizes and weights are alike. You can see it without a telescope and it's the second brightest object in the night sky after the Moon. Thick yellow clouds are always around Venus. However, Venus and Earth are also different. Venus does not have life and it does not have water like Earth. It takes two hundred and twenty four days to orbit the sun, for Earth it is three hundred and sixtyfive days. Venus has no moons. It is a dry, hot planet. Strong winds blow all the time. The Romans named it Venus for their goddess of love and beauty. <br> 36. Why is Venus called Earth's twin? <br> 37. What can you see around Venus? <br> 38.What is the weather like in Venus? |
