- a) The pizzas at this cafe are the in town. (better-best- good)
- b) Nothing is than war. (bad-worse-worst)

17. Read the following text and answer the questions. (2 points)

The sun, at the center of solar system, and the planets around it are among the wonders of creation. Venus is the second planet from the sun which is sometimes called Earth’s twin. This is because their sizes and weights are alike. You can see it without a telescope and it is the second brightest object in the night sky after the moon. Thick yellow clouds are always around Venus. However, there are some differences between Venus and Earth. Venus does not have life and **it** does not have water like Earth. It takes two hundred and twenty-four days to orbit the sun, for Earth it is three hundred and sixty-five days. Venus has no moons. It is a dry, hot planet. Strong winds blow all the time. The Romans named it Venus after their goddess of love and beauty.

- 1) It takes two hundred and twenty-four days for the Earth to orbit the sun. True False
- 2) Venus doesn’t have any moon. True False
- 3) The pronoun “it” refers to a) Venus b) Earth c) life d) water
- 4) Why are Venus and Earth called twins? -----

Good Luck!
