One of the most wonderful parts of our body is blood. It is a red liquid that goes around our body to keep us healthy and alive. In fact, it can go around our body because our heart pumps it all the time. There are red cells, white cells, plasma, and platelets in blood. Each of them does a special job. Red cells carry oxygen and collect carbon dioxide from body parts. White cells are like brave soldiers. They defend our body against microbes. Plasma is a yellow liquid that carries blood cells. More than half of the blood is plasma.

39.what does brave soldier in the text refers to ?.....

40. What is the job of white sells?

a.collecting carbon dioxide b.defending our body against microbes.

41.. There are only white cells in plasma. a. True b.False

42. Plasma pumps blood around our body all the time . a. True b.False
