ل) درک مطلب (2نمره)

A newborn baby can see, hear and feel . By the age of five , a child can talk and ride a bike .How does this development happen .? We don't really understand the way language and thinking develop in the brain . Now scientists are using new technology to help them in their studies . They are discovering new information about the way a baby's brain develops .

A Study in 2010 showed that the experiences a child has in their first few years are important. These experiences affect the development of the brain. The study showed when children receive more attention, they often have higher IQs. Babies receive information when they see, hear and feel things. This information makes connection between different parts of the brain. There are a hundred trillion connections in the brain of a three \_ year \_ old child.

40) According to the first paragraph .....

- a) most five-year-olds ride bikes
- b) scientists understand child development very well
- c) technology is useful in child development studies.
- d) learning a foreign language happens only true listening.

41. Why are early experiences important ?

- a) They increase a baby's relationship
- b) they affect brain development
- C) they affect how babies feel
- d) They let children feel happier

42) What information is given in the second paragraph ?

- a) attention and IQ are related
- b) Nothing can change a child's IQ
- C) some three \_ year \_ old children have a high IQ .
- d) language learning happens in adulthood .

43. According to the passage what makes new connections in the brain ?

- a) experiencing new information
- b) having a high IQ
- C) the child's age
- d) the place where the child live

With the best wishes  
Hedieh - Asadi
