#### **D. Reading comprehension**

**Read the following text and answer the following questions.**

Today, there are some endangered animals on Earth. It means that we can find only a few of them around us. Some examples are whales, pandas, tigers and Asian elephants.

Humans destroy the natural homes of the animals in the forests, lakes, and plains. When the number of people on Earth increases, they need more places for living. They cut down trees and destroy lakes. They make homes and roads instead. Then the animals won't have a place to live. They will die out.

The Iranian cheetah is among these animals. This wild animal lives only in the plains of Iran. Now there are only a few Iranian cheetahs alive. If people take care of them, there is hope for this beautiful animal to live.

**17. Which place is not a natural home of wild animals?**

- a. plains                      b. roads                      c. lakes                      d. forests

**18. When only a few numbers of an animal live on Earth, -----.**

- a. it means that it is an endangered animal                      b. the animals will live in the future  
c. they need more places for living                      d. their number increases

**19. The Iranian cheetah -----**

- a. destroys forests                      b. lives in many countries  
c. died out                      d. is an endangered animal

**20. People cut down trees and destroy lakes because -----.**

- a. the animals are endangered  
b. some animals died out  
c. the animals don't have a place to live  
d. they need more places for living

**Read the following text and choose the best answer for each number.**

Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can ---21--- in any area of the earth. They aren't all bad; in -----22---- you couldn't live without some bacteria! Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are ---23----- from bacteria because they cannot live on their own. Viruses need to be inside a ---24----- cell to live and grow. There aren't many good things about viruses, they usually attack your body and make you sick!

21. a. live                      b. do                      c. make                      d. see  
22. a. future                      b. instead                      c. fact                      d. example  
23. a. clear                      b. different                      c. wonderful                      d. useful  
24. a. famous                      b. living                      c. small                      d. injured
