4 **C. Read the following passage carefully and answer the questions.**

Heart is a strong pump that sends blood around your body. It works all the time, even when you are sleeping. It pumps blood that is full of oxygen and food to every part of your body.

You have blood everywhere inside your body. A blood sample is usually 45% blood cells and 55% plasma. The blood cells move in a yellow liquid. The liquid is called Plasma. It carries blood cells. Types of blood cells are red blood cells and white blood cells. Red blood cells give the blood its red color. There are 5 million of them in a drop of blood. Red blood cells are so small that you can't see them with your eyes. you can see them with a microscope. The red blood cells carry oxygen to every part of your body. White blood cells are larger than red blood cells, but there are less of them. There are 8000 in one drop of blood. They defend your body against microbes.

47. According to the passage, it is **not true** that
