B:Read the following passage then answer the questions . (4 points)

Venus is the second planet from the sun which is sometimes called Earth's twin .This is because their sizes and weights are alike. You can see it without a telescope and it's the second brightest object in the night sky after the Moon. Thick yellow clouds are always around Venus. However, Venus and Earth are different . Venus does not have life and it does not have water like Earth . It takes two hundred and twenty four days to orbit the sun, for Earth it is three hundred and sixty-five days. Venus has no moons. It is a dry, hot planet. Strong winds blow all the time .

40-It takes two hundred and twenty four days for Venus to orbit the sun .

a-True b-False 41- Venus has many moons . a- True b- False

42- What can you see around Venus ?43- Why is Venus called Earth's twin?44 - What is the weather like in Venus ?

Good luck
